Mid-Kick Flex Profile | Easy loading and maximized shooting power.

Asymmetrical Shaft Geometry | Enhanced bottom hand control, leverage and accuracy with increased durability strength against heavy puck impacts.

Minimus Carbon 25 | This carbon weave is flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The weave is thin and super light, yet extremely strong and resistant to damage.

VIBEX | Vibration reduction technology that dampens the feel from puck impacts.

Hi-Fused Construction | Super light balanced feel for efficient blockerhand movements.

TwinSpar | Paddle and blade reinforcements for increased stability on passes and saves.
